

# What's In Extras

2010/02/22

## 1 The Extras Folder

The Extras folder<sup>1</sup> contains several sub-folders with:

- duplicates of several GUI programs installed by the MacTeX installer for those who already have a TeX distribution;
- alternates to the GUI applications installed by the MacTeX installer; and
- additional software that a TeXer might find useful.

The following sub-sections describe the software contained within them. Table (1), on the next page, contains a complete list of the enclosed software, versions, OS versions<sup>2</sup>, licenses and URLs.

### 1.1 Bibliography

Bibliography programs for building and maintaining BibTeX databases.

### 1.2 Browsers

Programs to browse, look at documentation for and download extensions to LaTeX.

### 1.3 Editors & Front Ends

Alternative Editors, Typesetters and Previewers for TeX. These range from “WYSIWYM (What You See Is What You Mean)” to a Programmer’s Editor with strong LaTeX support.

### 1.4 Equation Editors

These allow the user to create beautiful equations, etc., that may be exported for use in other applications; e.g., editors, illustration and presentation software.

#### 1.4.1 Previewers

Separate DVI and PDF previewers for use as external viewers with other editors.

### 1.5 Scripts

Files to integrate some external programmer’s editors with the TeX system.

### 1.6 Spell Checkers

Alternate TeX, LaTeX and ConTeXt aware spell checkers.

### 1.7 Utilities

Utilities for managing your MacTeX-2009 distribution.

## 2 In Closing

If you find the distribution useful, please consider joining TUG, <<http://tug.org/join.html>>, or the TeX User Group best for you, <<http://tug.org/usergroups.html>>. If you want to report bugs or have a problem with the MacTeX distribution please contact <<http://www.tug.org/mactex/support/>> or e-mail directly to <[mactex-support@tug.org](mailto:mactex-support@tug.org)>. If you have TeX problems, please join the TeX on Mac OS X mailing list, <[http://mactex-wiki.tug.org/wiki/index.php?title=TeX\\_on\\_Mac\\_OS\\_X\\_mailing\\_list](http://mactex-wiki.tug.org/wiki/index.php?title=TeX_on_Mac_OS_X_mailing_list)>. For more information on TeX on the Mac see the MacTeX-wiki, <<http://mactex-wiki.tug.org/wiki/>>.

---

<sup>1</sup>Note: most applications found in Tiger folders work directly with Leopard. See Table (1) for more information.

<sup>2</sup>Note: If software is marked as compatible with Tiger (T) but not Leopard (L) there have been significant reports of trouble using it with Leopard. The same is true if it is compatible with Leopard (L) but not Snow Leopard (S).
